

## F'IS Administrator Release 4.4

Overview of new software features  
for FAG DTECT X1 and FAG ProCheck

### Order analysis (FAG ProCheck only)

- Improved and simplified monitoring of variable speed plant such as wind turbines
- Support in detection of any machine resonance problems

### Bearing database

- Shorter, simpler configuration and data analysis
- Supports the user in the assessment of components
- Contains 20,000 bearings from different manufacturers

### Profibus (available as option for FAG ProCheck)

- Reduced installation work
- Simple integration in existing infrastructure
- Advantage: Efficient data interchange with control systems (PLC)

### F'IS DB Cleaner

- More efficient data storage
- Facilitates deletion or thinning of data from the database (compatible with F'IS Administrator Database 4.4)
- Versatile configuration options by definition of rules
