

Course description

Product Training FAG Detector III Balancing

Training contents

The training course covers in particular the subject of balancing using the FAG Detector III Balancing Kit. Apart from basic balancing knowledge in general the participants will specifically learn about the balancing process with the FAG Detector III Balancing Kit. In practical exercises the participants will learn how to use the device safely and carry out balancing operations independently.

Target group

Technicians and engineers working in maintenance. Because a profound knowledge of the system FAG Detector III / F'IS Trendline is necessary to be able to take part in this course, the participation in the „Product Training FAG Detector III Basic“ is essential.

Training objective

The participants learn how to safely use the FAG Detector III / F'IS Trendline during a balancing procedure. The attendance of the course will be confirmed by a certificate.

Duration

1 day

Venue

FAG Industrial Services GmbH, Herzogenrath

Number of participants

4 - 8 attendees

Fee

- € per person

In this fee the training materials, catering and lunch are included. The price does not include the VAT of 19%.
